

**Heffron Services
2010 Application for Dust Control
Magnesium Chloride**

We, the undersigned, hereby make application for permission to apply Magnesium Chloride for the purpose of dust control in the below described location.

The applicant agrees to the following:

1. **Deadline for sign up is May 1st** To allow the county sufficient time to prepare the roads before the first application, any applications received after this date will include a \$20.00 late fee.
2. To maintain flags to identify the outer limits of the area to be treated with magnesium chloride. **Flags must be in place May 9th and kept visible until October 1st** to inform the motor grader operator of the location of the treated surface. Failure to do this could result in the area being bladed. Neither the County nor Heffron Services assume any liability if your flags are not in place. If area is not marked, drivers will use judgment for location.
3. **A permit is required by the county and can be obtained at the Harrison County Engineer's office. Dust control cannot be applied if you do not have a permit.**
4. Magnesium Chloride is a very effective dust control product, however, we do not guarantee its performance due to factors such as weather, surface preparation or heavy traffic patterns. 2 applications are recommended.
